SECTOR OVERVIEW

Maize is the third most important cereal crop in Pakistan after wheat and rice. It contributes significantly to food security and industrial needs, contributing approximately 3% to agricultural value added and 0.7% to GDP.

The vast majority of production occurs in Punjab, with a significant share also from Khyber Pakhtunkhwa (KPK). Maize is heavily utilized for poultry feed, livestock fodder, and industrial products such as starch and oil.

Pakistan is also exporting processed corn and sweet corn.
